

What if we Could end Paralysis ?

ACCELERATING BREAKTHROUGHS!

What if we could overcome paralysis? Save billions in public spending and transform millions of lives to a better future?

You've heard this before - the day before something is a breakthrough it is a crazy idea. And one person cannot change the world, but the world can change because of one person.

This is where my story of Kieran Macleod begins - he is one person who has a crazy idea that can change the world. And, if you are passionate about 'overcoming paralysis', 'augmented human performance', or 'transforming health care to a better future', I really think you'll love what Kieran has to say.

Kieran Macleod and I connected a few short months ago intending to share insights for the NextGen Economy Podcast; and I was unexpectedly distracted by Kieran's story of recent tragedy and personal new trajectory. In 2019, Kieran was in Thailand raising capital and connections for a decentralized finance company when tragedy struck - he and his business partner were in a traffic accident that left kieran a paraplegic changing the trajectory of his life in an instant.

Kieran is now focused on saving money and raising personal capital to buy an ExoSkeleton that would transform his daily personal life AND limit his dependence on the public health care system. Inspired by Kieran, then doing further research, I then learned that a cure for paralysis due to spinal cord injury is possible, but it will take time, resources, and a smart way of thinking.

Armed with this knowledge, an 'Edge' team was formed from the OpenExO global ecosystem of entrepreneurs, coaches, consultants, and investors to take on a grand challenge - to provide the mindset shift, tools, and resources to Enable Augmented Human Performance. The team is working on three opportunities:

Our 'Why' related to Enabling Augmented Human Performance

The opportunities exist because there are currently two big problems (amongst others) related to the current human experience with paralysis:

1. we are not currently doing enough to enable Personal Autonomy and well being for Paralyzed People

Listen from [02:38]

2. It's Possible to Exponentially Reduce Public Health Spending and Perpetuate the 'Sick Care' Crisis

Listen from [02:38]

EXO ECONOMY x KIERAN MACLEOD

A collaboration to launch the exoskeleton roadshow Connecting “**Augmenting Human Performance**” with a tokenized economy.

THE FIRST OF MANY
Futurville led Projects

You are Invited to End Paralysis and Enable Augmented Human Performance

With the data, and driven by their massively transformative purpose “Enable Augmented Human Performance”, kieran and the OpenExO Edge team invites you to join our 'open-source' projects to

Support access to Exskeleton Suits for Paralyzed People

ExO Tokens, other select
cryptocurrencies and all major
currencies by donation

Join the mission and watch for
launch of NTF's

Participate in the ExOSkeleton Roadshow

Let people experience your
product to fast-track
adoption

Try an ExOSkeleton. Experience
the transformation it can make
for you or a loved one.

Building a hybrid physical- digital Village destination to end paralysis

step #1

Be part of the village
Design Sprint early 2022.

Join the mission to receive
program registration link.
